

Remote monitoring and refrigeration

Matos from Ethicheck - the most advanced medical fridge monitoring, alerting & fail-safe system is now available in the UK.

The ONLY system on the market to constantly monitor the fridge online, send automatic alerts if there is a problem, AND take over the fridge in case of most fridge component failures.

Here are just a few testimonials from satisfied users in Australia:

- *“We have Matos in four of our clinics.*
- *The system saved an entire fridge worth of vaccines just last week.*
- *Overall we could not be happier.”*

Clinic Manager, Miwatj Health Aboriginal Corporation, Northern Territory

-
- *“It saves staff time, not having to be onsite to clear alerts and reduces after hours call outs. Less time spent on cold chain data reporting as reports are automatically emailed.*
 - *Email / SMS alerts: Time saving and convenience of being able to check temperatures / alerts by email.*
 - *Website: you have a history of alerts and their cause. Ability to log in anywhere and check temperatures / alerts is very convenient.”*

Environmental Health & Immunisation Support Officer, Shire of Campaspe, Victoria

-
- *“We had fridge monitors installed on 12 medication fridges across 2 campuses.*
 - *The alerts received via email promote prompt action to refrigerator temperature breaches.*
 - *Overall, the monitors have enabled more thorough temperature logging, prompt response to temperature alerts and recording of actions taken which has been an important component in achieving compliance with national accreditation standards.”*

Manager Pharmacy Services, Djerriwarrh Health Services, Victoria

-
- *“The MATOS system of providing real time information has been very useful to the Pharmacy Department.*
 - *The monthly emails with data downloads allow me to monitor fridges.*
 - *The alerts provide instant information if something has failed, power, fridge door open, fridge failure and we can attend to this quickly.”*

Acting Director of Pharmacy, Repatriation General Hospital, South Australia
